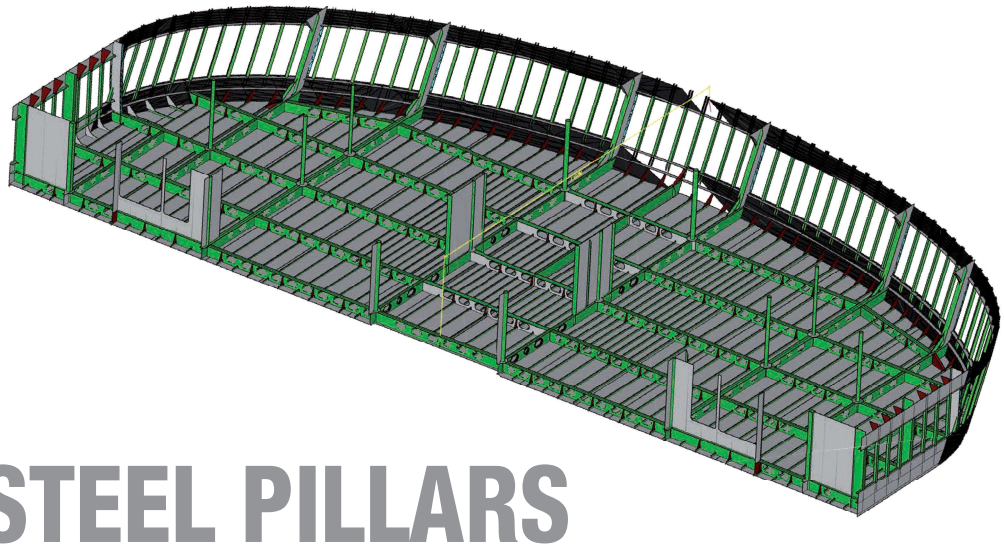
Armando Cimolai
Centro Servizi s.r.l.

NAVAL STEELWORKS

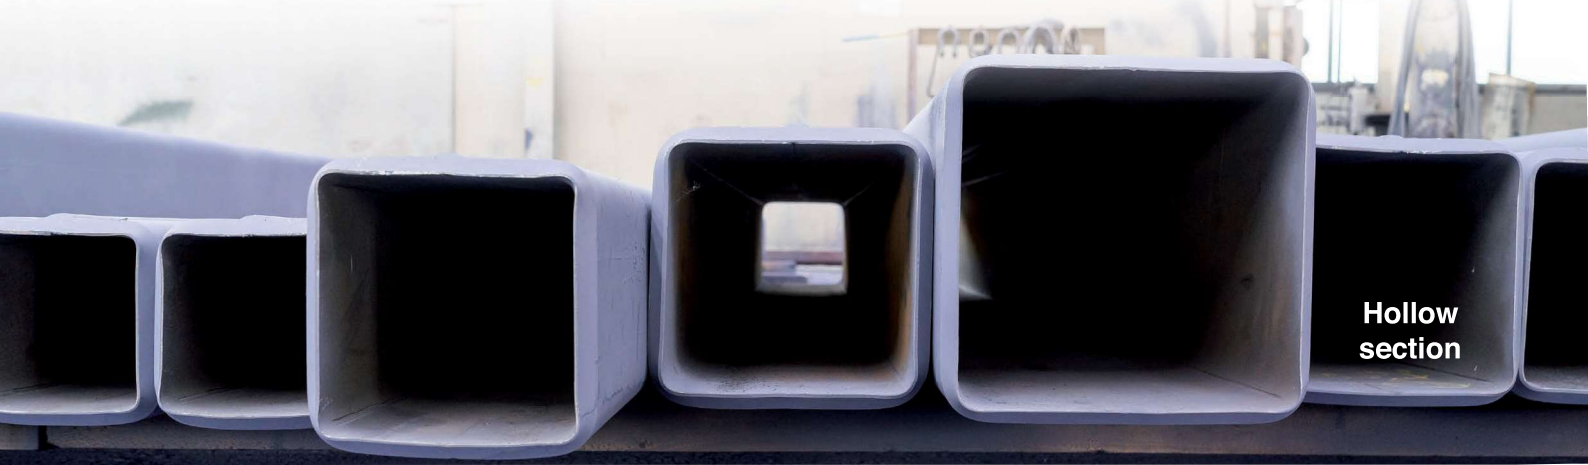
The Company Armando Cimolai Centro Servizi is specialized in structural steelworks, press forming and bending, civil and industrial buildings, welded beams for **NAVAL** and off-shore industries, corrugated bulkheads in stainless/carbon steel for tank ship, cylindrical and polygonal towers for power and telecomunication lines and more recently in special mechanical machining of heavy steelwork.



STEEL PILLARS

BENDING OPERATIONS

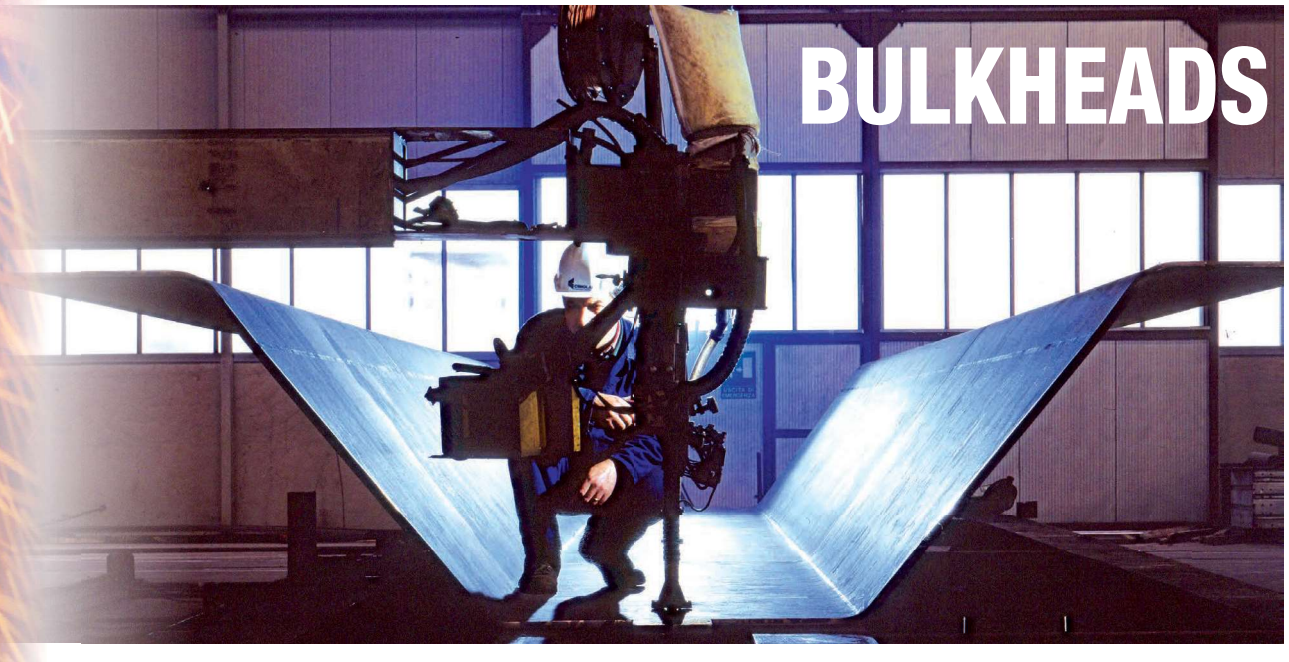
are performed by means of hydraulic presses of various types and capacity.
The biggest press (3.000 ton) can bend 15 m long elements (carbon and stainless steels).



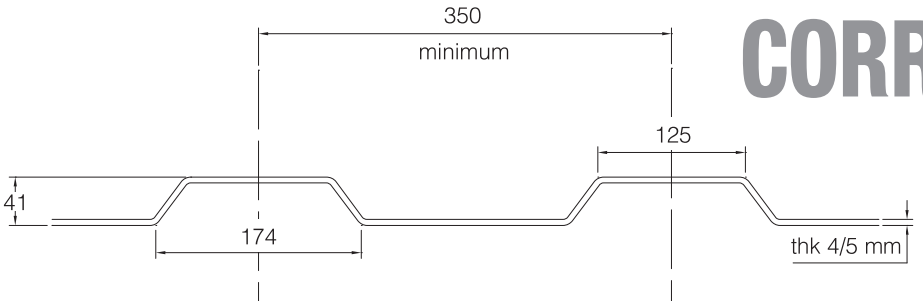
STEEL WORKS

WELDED PROFILES

The workshop is equipped with automatic and traditional welding systems.
The majority of the automatic systems consist in machinery for submerged arc welding (twin arc and tandem).



BULKHEADS



CORRUGATED METAL SHEETS
